HiveMQ CLOUD

Fully Managed
Cloud MQTT Platform

With HiveMQ Cloud, companies can develop, test, deploy, and scale production IoT use cases without the large investment and complexity of maintaining their own infrastructure.

✓ Unlimited connections
Take advantage of unlimited connections on any paid plan. Choose a plan that suits your needs, then add connections seamlessly as you grow.

✓ Fully-managed
Develop, test, deploy, and scale production IoT use cases anywhere without worrying about setup, maintenance, updates, or maintaining infrastructure.

✓ MQTT compliant
Take advantage of all advanced MQTT features at scale. HiveMQ Cloud is 100% compliant with the MQTT 3.1, MQTT 3.1.1 and MQTT 5 specifications.

✓ Secure by design
Ensure IoT data and applications meet the highest security standards with end-to-end TLS encryption, choice of device authentication methods, and more.

✓ Elastic scale
Start with a POC or small deployment and seamlessly scale up to millions of connections and thousands of messages per second as the use case evolves.

✓ Support by experts
Receive the support you need throughout your IoT project lifecycle. From community support up to dedicated 24/7 support, choose a plan that suits your needs.
